Technical Skills

Languages Python · JavaScript · SQL · Java

Frontend HTML5 · CSS3 · JavaScript · React · Tailwind CSS · Responsive Design

Backend FastAPI · REST APIs · Firebase Authentication

Databases MySQL · SQLite · Firebase Firestore

Developer Tools Git · GitHub · Linux · Postman · GitHub Actions

Other CI/CD · API Integration · UI/UX · Performance Optimization

Projects

PurePixel -- Luxury Beauty E-Commerce Frontend

HTML5 · CSS3 · JavaScript

- Developed a responsive luxury beauty e-commerce frontend using semantic HTML5, modern CSS3, and Vanilla JavaScript.
- Engineered reusable UI components including product listings, shopping cart, search, filtering, and interactive navigation.
- Implemented dark/light themes, smooth animations, lazy loading, and responsive layouts for desktop and mobile devices.
- Optimized frontend performance through modular JavaScript architecture and clean component organization.

AIR -- AI-Powered News Aggregation Platform

React · FastAPI · Firebase · Gemini API

- Developed a full-stack AI-powered news aggregation platform using React and FastAPI with Firebase Authentication.
- Integrated Gemini API to generate AI summaries while aggregating content from 100+ RSS news sources.
- Built secure REST APIs, automated deployments with GitHub Actions, and optimized prompt workflows.
- Designed a responsive interface emphasizing authentication, usability, and rapid content discovery.

Partix -- Interactive 3D Particle Text Engine

HTML5 Canvas · JavaScript

- Built an interactive particle text engine using HTML5 Canvas and Vanilla JavaScript with physics-based particle interactions.
- Implemented real-time text generation, mouse interaction, and optimized animation loops for responsive rendering.
- Designed modular rendering logic enabling configurable particle behavior and interactive visual effects.

Formula 1 Strategy Lab

Python · FastAPI · FastF1

- Developed a backend-first Formula 1 analytics platform exposing seven RESTful API endpoints for telemetry, race strategy, and driver performance analysis.
- Architected modular analytical services supporting telemetry visualization, lap comparison, track mapping, and strategy recommendations.
- Integrated FastF1 with request caching for efficient telemetry processing and scalable backend workflows.

Experience

Web Developer Intern

Sep 2025 -- Oct 2025

SkillCraft Technology

- Developed and deployed four responsive web applications using HTML, CSS, and JavaScript following modern frontend development practices.
- Utilized Git for version control while improving frontend maintainability, browser compatibility, and application performance through code optimization.

Education

Bachelor of Engineering in Computer Science

Expected Graduation: 2027

Visvesvaraya Technological University

Certifications

CS50x: Introduction to Computer Science

Harvard University
